

GAMIFICATION STUDIO

NANDINI

Quickstart

Launch your first interactive, prize-winning experience in 7 simple steps.

June 2026

Welcome 🙌

NANDINI turns ordinary website visits into fun, rewarding moments — and quietly collects leads while people play.

You don't need any technical skills to use it. In the next few pages you'll create a campaign, pick a game, add a prize, put it on your site, and watch the results roll in. Each step takes a couple of minutes. Let's go.

Need the full detail later? Ask your team for the *NANDINI Studio Operator Manual* — it covers every feature.

1 Sign in

Open NANDINI and sign in with the email and password your team set up.

Everything lives in one place — your campaigns, prizes and results. Forgotten your password? Use the “Forgot password?” link on the sign-in screen.

NANDINI
Interactive Labs

“Turn every customer interaction into a moment of delight — and every visit into a new lead.”

- Launch campaigns in minutes, not weeks
- Works with your existing website and apps
- Built for Nepali businesses of all sizes

© 2026 NANDINI Interactive Labs. All rights reserved.

2 Create a campaign

Click + **New campaign**, give it a name, and pick a game to start from.

A *campaign* is one interactive experience — like a spin-to-win promo or a festival quiz. NANDINI sets it up with sensible defaults so you have something that works straight away.

Use this game

3 Choose your game

Browse the game library and pick the one that fits your goal.

There are 13 ready-made games — spin the wheel, scratch card, quiz, poll, mystery box and more. Tap any game to preview it and read what it does. Don't overthink it; you can change it later.

4 Make it yours

Open the campaign and tweak the words, colours and prizes.

In the campaign editor you can edit the on-screen text (**Steps**), match your brand colours (**Theme**), and add languages (**Languages**). Small changes go a long way — a friendly headline and your brand colour are enough to start.

Want extra polish? On the **Theme** tab you can add a **background image** that sits behind every screen (a built-in dimmer keeps text readable), and the prize reveals come with built-in cinematics — light spills from opening doors and boxes in your chosen colour. Both are optional and look great out of the box.

5 Add your prizes

On the **Prizes** tab, add what players can win.

Click **+ Add reward**, give it a name, choose a type (a voucher code, a link, points, or anything custom), set how many are available, and optionally add a picture. Players see the prize — and its image — when they win.

The screenshot shows the Nandini Interactive Labs dashboard. On the left is a dark sidebar with navigation links: Dashboard, Campaigns (selected), Templates, Packages, Reporting, Players, Settings, and Admin. The top header includes the Nandini logo, a 'Demo Org' dropdown, a 'Super admin' role indicator, and language/region settings (English, DU).

The main content area is titled 'Campaigns' and shows a specific campaign: 'Himalayan Brew — Dashain Mega Rewards'. It has a 'Published' status and a game ID. Below the campaign name are buttons for 'Duplicate', 'Save as template', 'Reset test data', and 'Delete'. A navigation bar below the campaign name includes links for Settings, Steps, Theme, Languages, Prizes (selected), Analytics, Publish, Connected tools, and Custom CSS.

The 'Prizes' tab is active, displaying a section titled 'How winners receive prizes' with instructions and a list of steps: 1. Win screen, 2. Reveal step, and 3. Collect & email. Below this is a 'Rewards' section with a '+ Add reward' button and a description: 'Set up the prizes players can win — and choose how each one is handed out: a unique voucher, a shared promo code, a link, or points.'

The rewards are listed in a grid:

- Free Himalayan Latte** (free-coffee): 0 of 1000 awarded. Buttons: Edit, Upload codes, Delete.
- 10% Off** (off-10): 0 of 1000 awarded. Buttons: Edit, Upload codes, Delete.
- 20% Off** (off-20): 0 of 1000 awarded. Buttons: Edit, Upload codes, Delete.
- Free Cookie** (free-cookie): 0 of 1000 awarded. Buttons: Edit, Upload codes, Delete.
- Free Pastry** (free-pastry): 0 of 1000 awarded. Buttons: Edit, Upload codes, Delete.
- VIP Voucher** (vip-voucher): 0 of 1000 awarded. Buttons: Edit, Upload codes, Delete.
- Mystery Gift** (mystery-gift): 0 of 1000 awarded. Buttons: Edit, Upload codes, Delete.
- Quiz Master Badge** (quiz-master): 0 of 1000 awarded. Buttons: Edit, Delete.
- +2 Bonus Turns** (bonus-turns): 0 of 1000 awarded. Buttons: Edit, Delete.
- Rs 200 Dashain voucher** (festival-voucher): 0 of 500 awarded. Buttons: Edit, Upload codes, Delete.

At the bottom, there is a 'Recently awarded' section showing 13 items. Below that is a 'Redeem a code' section with a text input for 'Voucher code' and a 'Redeem' button. A note says 'Staff use — scan or type a voucher code to mark it as redeemed.'

6 Publish & add to your site

Open the **Publish** tab and copy the one-line snippet.

NANDINI runs a few quick checks, then gives you a single line of code. Paste it into your website once (your web person or site builder can do this in a minute). That's it — your experience is live. Future edits you publish appear automatically.

Campaign lifecycle

Your campaign is live. Pause it to temporarily stop new plays without removing the embed from your site.

PauseArchive

Live play page

Share this link to let anyone play the game directly — no embed needed. Useful for testing and sending to clients.

http://localhost:3000/play/cmp_vdo7x5dm587n8se4c31wzx0d

Embed snippet

Paste this snippet into your website's HTML to display the game widget. Place it just before the closing `</body>` tag.

Where it appears

#gam-widget

Pin to current version

Copy

```
<script src="http://localhost:3000/loader.js" data-campaign="cmp_vdo7x5dm587n8se4c31wzx0d" data-mount="#gam-widget" async></script>
```

Where does your website live?

Pick your platform to see how to paste the snippet.

ShopifyWordPressWebflowAny other site

1. Create an empty `<div id="gam-widget"></div>` placeholder on your page where the game should appear.

2. Paste the embed snippet just before the closing `</body>` tag in your page HTML.

3. The game will load and fill the placeholder automatically.

4. Adjust the mount selector (data-mount attribute) if your placeholder has a different id.

How does the mount selector work?

Show

Advanced: my site uses a security policy (CSP)

Show

Preview

Full flow runs the real experience (creates a preview session — clear with Reset test data). Switch to Default game for a side-effect-free preview.

Full flowDefault gameDesktopPhone

Scan to test

Reload

Display mode

How the game is framed on the page. The standalone play page is always full screen; an embedded game can be set per-page if you need to.

Card

Sits inside your page — best for adding alongside other content

Full screen

Fills the whole screen — best for a dedicated play page or kiosk

Replays & turns

How can people play again? Pick one. The first three are simple; choose Turns for fine control (e.g. "3 spins a day, quiz once").

One play
One play per visitor
— the default.

Once a day
Replay once every 24
hours.

Unlimited
Replay as many times
as they like.

Turns ⚡
Players spend turns
to play — top up on
sign-up or daily.

Define your turn types and how players earn them. Then set how many turns each game **costs** on its game step in the **Steps** tab. Out of turns? The game is skipped and the player is told to come back later.

Allowed domains

Restrict which websites can run this campaign. Leave empty to allow it anywhere. Subdomains are included automatically — adding `example.com` also allows `shop.example.com`.

example.com

Add

⚠ This campaign can be embedded on any website.

7 Watch it work

Open **Analytics** to see plays, completions and the leads you've captured.

You'll see how many people played, how many finished, which prizes went out, and the contact details people shared — ready to export. The **Reporting** screen rolls this up across all your campaigns.

You're live! 🎉

That's the whole loop: create → customise → add prizes → publish → measure.

A few friendly tips:

- Test your campaign yourself first, then use **Reset test data** so your reports start clean.
- Keep copy short and the prize clear — simple experiences convert best.
- Check **Analytics** after a few days and adjust what isn't working.
